Precise Automation and Pacific Technical Products Sign Distribution Agreement

Los Altos & Valencia, California – August 29, 2006 – Precise Automation, a leading innovator in low-cost, high performance automation, and Pacific Technical Products, a leading provider of High Technology Motion Control and Automation Solutions, have entered into a distribution agreement. This agreement allows Pacific Technical Products to sell and support Precise Automation's products in Southern California. These products include PrecisePlace Robots, Guidance Motion Controllers and PreciseVision Software.

Brian Fisher, President of Pacific Technical Products, stated, "Precise Automation brings new and innovative products to the market. These products are at a feature/value point which customers have been requesting. Precise Automation has the pulse of the marketplace and we are excited to be associated with them."

Brian Carlisle, President of Precise Automation, stated, "We are delighted to be working with PTP in Southern California. PTP has extensive experience in both general automation and specifically in robotics. They are an excellent fit for our product lines of controls, machine vision and small part assembly and material handling robots."

ABOUT PRECISE AUTOMATION

Precise Automation is a leading innovator in low cost, high performance, table top vision-guided robots and robotic motion controllers. The versatile Cartesian robots feature ultra smooth, precise motion and are available with three or four axes in a variety of axis lengths. The robots come fully assembled and are extremely easy to set up. They come out of the box and into your application. The vision-guided motion controllers integrate motor drives, powerful, user-friendly software and vision, and network capabilities in a small foot print. These controllers can drive and control small robots as well as room size gantries. Precise Automation's flexible products serve a wide variety of industries including: electronics, semiconductor, life science, medical products and mass storage.

ABOUT PACIFIC TECHNICAL PRODUCTS

Pacific Technical Products is an Automation Solution Provider which focuses on Motion Control, PC Based Automation, Sensors, Safety, Networking, Communications, and Identification Systems. PTP has been Southern California's Technical Resource for Motion Control and Machine Automation Solutions since 1985.
