### **Precise Automation Licenses Machine Vision Technology**

Los Altos, California --July 12, 2004-- Precise Automation has signed a license for machine vision technology with CyberOptics Inc. and Datacube Inc. The license gives Precise access to the source code for a complete set of machine vision tools including the MaxVision™ toolkit and a patented object locator. Under the terms of the agreement, CyberOptics will receive improvements made by Precise for a period of time.

Mr. Brian Carlisle and Dr. Bruce Shimano, the founders of Adept Technology Inc., founded Precise Automation in January of 2004. Mr. Carlisle stated, "Dr. Shimano and I believe that machine vision is a critical element of a motion control system for both part feeding and motion guidance. The addition of vision technology from CyberOptics and Datacube will give Precise a world class machine control platform."

Dr. Scott Roth has joined Precise and will be advancing the machine vision tool set and integrating it with Precise's motion control language. Dr. Roth has 30 years of experience in machine vision and worked with Carlisle and Shimano at both Unimation™ Inc. and Adept Technology, Inc. where he developed many landmark vision tools for automation.

Precise expects to begin delivering products early next year. OEMs and other customers who would like to participate in the development cycle of this next generation of assembly robots and controls should visit [www.preciseautomation.com](http://www.preciseautomation.com). For further information, email us at [sales@preciseautomation.com](mailto:sales@preciseautomation.com), or call our sales line at (530) 888-6256.

Precise Automation designs and sells compact, low-cost, high performance vision-guided robotic motion controllers with integrated motor drives and a line of new mechanisms for the electronics, semiconductor, and life sciences industries. Precise partners with OEM's in the design, manufacturing, integration, and distribution of these products. MaxVision is a trademark of Datacube. Unimation is a trademark of Stäubli AG.
